

**SURETANK**

Engineering a better, safer future

# Engineering Services

**Improve the engineering design and build process by using a highly qualified and experienced partner.**

## Suretank's dedicated engineering department specialises in mechanical and electrical engineering

With over 20 years experience in building engineering equipment for the offshore environment, we can offer:

- consultancy support and advice on the re-design of existing products
- consultancy support and advice with the design of new products
- support with problematic issues with offshore equipment design

Our engineering services team is supported by an experienced R&D department. Design of new products which improve the operational activities of our customers is a constant focus here at Suretank.
