

SURETANK

Engineering a better, safer future

Recertification

Recertify your offshore tanks and containers with the best qualified partner

Equipment recertification is required for ongoing safety in the offshore environment

Suretank has more accreditations than any other company in the field and is well positioned to advise and assist in the recertification process for all the approval agencies, including DNV-GL, Lloyds Register, ABS, BV, RSA and NSAI.

Our experienced team will assess units at port or on site at one of our 7 global manufacturing locations to diagnose and rectify any potential issues at the start of the process. We will then manage the process correctly regardless of the certification requirements.

For more information call +353 41 686 2022, email sales@suretank.com or visit suretank.com/recertification
